Webmaster/Research/Progress](http://www.danielsorogon.com/Webmaster/Research/Progress)

- SPIE

- Give Machine Learning course notes to CJT.
- A referencing tool will be made available, possibly on a new workstation.
- Form 2 has been printed out and feedback will be given, possibly next week.
- Post-course work is to be completed without deadline extensions, although extensions remain a possibility.
- Monday meetings are to be attended (Monday 13:00, G706). John Carr needs to be notified too.

Reading

- Read the recently submitted ECCV paper.

Progress Made

- By working “from dusk until dawn” I was able to finish the post-course deliverable in just 3 days.
- John Carr has been left a memo about Monday’s meetings.
- Conferences proceedings on-line have been added to:
<http://www.danielsorogon.com/Webmaster/Research/Progress/index.htm/#Conf>
- The recent submission to ECCV has been carefully read. More papers from various journals have been read, but usually in brevity.
- CVS Account for the internal ISBE pages has been created for me by Ian Scott. I anticipate some personal involvement.

Next Stage

- Form 2 needs to have been submitted, copied and filed by now.

- Review the on-line journals and conferences list. Leave out all irrelevant ones and add potentially helpful ones. This list includes sources that *will* be reviewed and so must be precise.
